## **ABOUT ME**

Hello, I'm Tyler Boundy, a 23-year-old male with a bilingual proficiency in French. I aspire to be a gameplay programmer in the game development industry. With over a year of experience as a contracted programmer at HungryBilly, I have honed my skills and gained valuable insight into the dynamic world of game development.

I am highly computer literate and extremely sociable so working a till and communicating with customers are a natural experience for me.

Incredibly interested in everything technology, from video games to computer science. I spend a lot of time in front of my personal computer, communicating with friends and family alike. I have a passion when it comes designing or discussing games as a whole and really enjoy collecting any kind of gadget. I would really like to have a modern technology driven home one day.
